

JOB VACANCY RECRUITMENT AD

POSITION: Full Stack Developer

SALARY: Based on Years of Experiences

LOCATION: Petaling Jaya (Main) and Cyberjaya (Site)

JOB DESCRIPTION:

The role is mainly responsible in developing and maintaining both customer facing and in-house applications/integrations. Development focuses from initial PoC to full production.

Day-to-day duties vary by project/engagement and include different programming languages, technologies and environments. Experience with enterprise software development process, best practices and tools.

Responsibilities including:

- Develop and maintain front-end (web and mobile) and back-end (microservices) applications.
- Participate in the full software development life cycle.
- Gather and analyse user requirements, and prepare technical specifications and proposals for customers.
- Prepare design specifications and develop software according to the specifications.
- Prepare test plans and conduct unit and system testing.
- Contribute to code reviews for quality assurance and conformance to standards.
- Provide system support including investigating system issues and proposing solutions.
- Prepare user manual and provide training to users.
- Perform system upgrade, deployment of new system, or provide technical expertise during system upgrade and deployment of new system.
- Perform any other duties and responsibilities assigned by the Line Manager to ensure operational efficiency.

REQUIREMENTS:

- Possess at least a Bachelor's Degree in Computer Science, Information Technology, Software Engineering, or equivalent.
- Familiar with fundamental front-end languages HTML, CSS, JavaScript, and Typescript.
- Familiar with front-end framework Angular.
- Experience working with server-side languages Java, Go and Node.js.
- Experience working with backend framework Gin and Spring Boot.
- Experience working with both SQL and NoSQL databases such as MySQL, PostgreSQL, and MongoDB.
- Experience with both front-end and back-end development (full stack).
- Understanding of container technologies (Docker, Podman, etc.)
- Understanding of container orchestration technologies (Nomad, Kubernetes etc.)
- Knowledge of writing unit tests, automated testing tools, UAT management .
- Knowledge of browser and server-side troubleshooting and debugging practices and techniques.
- Knowledge of both consuming and designing RESTful APIs and gRPC.
- Able to work under own initiative and as part of a small team.
- Passionate in a Start-up environment.

HOW TO APPLY:

Submit your resume to hi@discoverix.my before 14th October 2022 (Friday).
